

Its Here!

Now DataManager 3.0 becomes **Virtual Energy Manager online**. With more capabilities, enhanced speed, and greater ease-of-use.

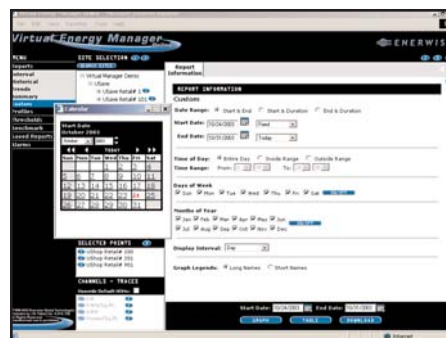

A new name and a new enhanced product; **Virtual Energy Manager online** is here, ready for your use today! With dramatically simplified tools and new features, Virtual Energy Manager online now becomes an even greater, more powerful resource.

Just look at the enhancements:

- 1 **Intuitive, friendly interface**
- 2 **Greatly improved response times**
- 3 **Extremely rapid site hierarchy navigation**
- 4 **Simple site search capabilities**
- 5 **Easy-to-use alarm management for email notification of threshold exceptions**
- 6 **Simultaneous multiple report window capability**
- 7 **User defined categories for saved reports**
- 8 **Access to site information such as site number and state**
- 9 **One-click access to common reports**

One-Click Access to valuable Reports, Profiles, Threshold analyses, Benchmarking, and favorites.

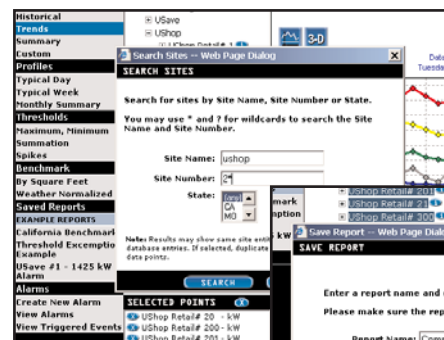

DataManager 3.0's flexible and powerful Report definition tools remain in place for advanced users of Virtual Energy Manager online.

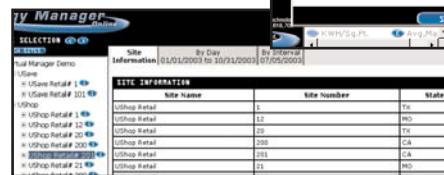

Multiple Report windowing for comparing and contrasting interrelated data or exploring cause and effect relationships.

Speed and Usability

Now the responsiveness, usability, and functionality you need are available in **Virtual Energy Manager online**.

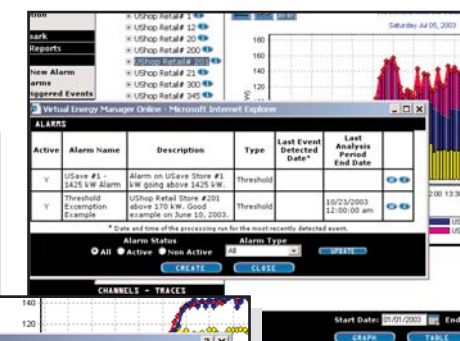

Site Search capabilities find the information you need quickly and efficiently.

Site Name	Site Number	State
USave Retail# 1	101	TX
USave Retail# 12	122	MD
USave Retail# 20	200	TX
USave Retail# 200	200	CA
USave Retail# 21	211	MD
USave Retail# 211	211	MD

One-click access to important site data, such as site name, site number and location.

NEW RELEASE

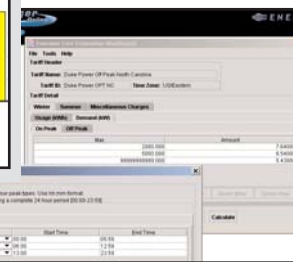

Create and edit threshold e-mail notification settings. One-click access to triggered event data.

Categorize and Save report favorites for quick one-click recall. Saves generic report templates and apply to different sites.
